

# Newtown Creek CM-01 Manhattan Pumping Station

# CSM

## *Milestones to completion of project:*

- ◆ Installation of interim emergency power facilities
- ◆ Renovation of New York City Housing Authority playground facilities
- ◆ Replacement of the screening facility's sluice gates and screens
- ◆ Replacement of the two main sewage pumps installed, tested, accepted, and fully operational
- ◆ Emergency Power System installed, tested, accepted, and operational; includes the installation of the final three pumps
- ◆ Contract completion
- ◆ Perform construction inspection for conformance of the work with the plans and specifications, and report any deviation to the Resident Engineer.
- ◆ Prepare and maintain daily construction inspection reports, which shall indicate the Contractor's work activities, progress of the work, crew size and composition, weather, equipment utilization, and all other information relative to the execution of the work.
- ◆ Maintain payment records, including the verification of contractor's time and material sheets, and assist in the review of the Contractor's partial payment requests.
- ◆ Maintain as-built drawings of the work, indicating any deviations from the contract drawings or approved shop drawings.
- ◆ Perform all other inspection and field duties as required by the Resident Engineer.
