

Long Island Expressway and Cross Island Parkway Interchange Rehabilitation D012553

As a sub consultant to GPI, CSM performed construction inspection services on this \$150 million rehabilitation project. The project consisted of the Reconstruction of the Long Island Expressway /Cross Island Parkway Interchange in Douglaston, N.Y. Work on this project involved a 1.8 mile section of the LIE between Exits 29-32 which included lane widening and construction of 14 new bridges on the interchange, as well as the reconstruction of several existing bridges from Cloverdale Boulevard to the New York City / Nassau County Line.
